## Stardust Raw & Calibrated (81P & AnneFrank)

- Stardust next.cat need updated references
- Calibrated data not in SI units :  $W/(cm^2 \cdot nm \cdot sr)$   $\rightarrow$  should be  $W/(m^2 \cdot nm \cdot sr)$
- Dataset.cat: following figure is incomprehensible:

- Dataset.cat includes a broad description of data acquisition. Is there a table with what was observed when?
- Where is the calibration data and how do I find it?
- SNR maps: The noise is higher in the coherent noise bars than in the background sky. This is not reflected in the SNR map.
